| SIGN SPACING TABLE | |
|--------------------|---------|
| Speed | X |
| 45/50 MPH | 150 m ± |
| 35/40 MPH | 105 m ± |
| 25/30 MPH | 60 m ± |

NOTES

1. Floodlights shall be provided to mark flagger stations at night.
2. If entire work area is visible from one station, one flagger may be used, otherwise two flaggers and signing will be required each direction.
3. Sign sequence is the same for both directions of travel.
4. See Buffer Data Table. Use of buffer vehicle is recommended, it may be a work vehicle. If buffer vehicle is used, minimum from end of taper to work area shall be total of "R" (roll ahead distance) plus length of vehicle, plus "B" (buffer space). If buffer vehicle is not used, minimum distance shall be "B".
5. Steady burning warning lights (Type C, MUTCD) should be used to mark channelizing devices at night as needed.
6. Either reverse cone taper or sign G20-2a may be used to show end of work area.
